

### PRODUCT DESCRIPTION:

PERMAKOTE SUPER PLUS® is a Matte Finish, Bright White, Elastomeric Acrylic Polyurea, Insulative and Reflective Ceramic, Waterproofing High Durability Ponding Water Formula, Protective Roof Coating and Ponding Water Area Topping. Innovative Resin Technology combines a superior blend of elastomeric acrylic resin and a single component polyurea to form a super strength high durability ponding water coating and ponding water area topping. Use as either: 1- a complete three coat system which includes a primer coat of PERMABOND<sup>™</sup> or METAL-PRIME RED-OX<sup>™</sup> and two coats of PERMAKOTE SUPER PLUS<sup>®</sup> or 2- as the third and final coat over one coat of primer and one coat of PERMAKOTE PLUS<sup>®</sup>, or 3- as a ponding water area topping over the completed PERMAKOTE PLUS<sup>®</sup>. System (see Warranty Information Below). A water-based, high build formula that possesses waterproofing, insulating and PERMAROTE PLUS<sup>®</sup> System (see Warranty information Below). A water-based, high build formula that possesses waterproofing, insulating and soundproofing properties that beautifies, protects and extends the life of most any sloped and flat roofing surfaces. Designed for well drained flat and level roof surfaces that do not accumulate any setting or standing water in excess of ½" deep. (For surface specifications, see warranty compliance information section below.) Forms a monolithic, thick rubber like ceramic shield of protection that expands and contracts with varying hot and cold temperatures, plus excellent resistance to thermal shock. Unsurpassed in technology, PERMAKOTE SUPER PLUS<sup>®</sup> is an energy saving reflective coating that offers extended ponding water resistance, superior mildew resistance, ceramic insulation & soundproofing, excellent adhesion, U.V. ray reflectivity and a beautiful matte finish. An energy saving coating that combats the destructive environmental forces of nature. PERMAKOTE SUPER PLUS<sup>®</sup> qualifies for the CLASS A Fire Rating Text energy ASTM ERGA (1) life Statu Coade. This event the apply weigh environmental forces of autors. Test as per ASTM E84-01, NFPA 101 Life Safety Code. This easy to apply roof coating system will provide many years of durable protection and outstanding beauty, and will extend the roof's life. PERMAKOTE SUPER PLUS<sup>®</sup> is an inexpensive alternative solution to roofing and re-roofing. PERMAKOTE SUPER PLUS<sup>®</sup> offers a 10 YEAR LIMITED MATERIAL WARRANTY on sloped roofs and on qualifying flat roofs (see Warranty Compliance Information Section).

#### PRODUCT USES:

Use as either: 1- a complete three coat system which includes a primer coat of PERMABOND™ or METAL-PRIME RED-OX™ and two coats of PERMAKOTE SUPER PLUS<sup>®</sup> or 2- as the third and final coat over one coat of primer and one coat of PERMAKOTE PLUS<sup>®</sup>. or 3- as a ponding water area topping over the

Use as either: 1- a complete three coat system which includes a primer coat of PERMABOND<sup>1</sup><sup>m</sup> of METAL-PRIME RED-OX<sup>1</sup><sup>m</sup> and two coats of PERMAROTE SUPER PLUS<sup>®</sup> or 2- as the third and final coat over one coat of primer and one coat of PERMAROTE PLUS<sup>®</sup>, or 3- as a ponding water area topping over the completed PERMAKOTE PLUS<sup>®</sup> System (see Warranty Information Below). Recommended for well draining, FLAT or SLOPED roofing surfaces (see Warranty Compliance Information Section Below). Excellent adhesion on weathered wood, shakes, plywood, clapboard, primed metal, galvanized, aluminum, tin, copper, asbestos, asphalt, urethane, polyester, primed styrofoam, fiberglass, built-up-roofs, bonded roof gravel, rolled roofing, modified bitumen membranes, mineral surfaced roofing, concrete tiles, clay tiles, masonry tiles (flat or barrel), primed synthetic or aluminum, adobe, slate, slab, properly prepared EPDM, and various other substrates. PERMAKOTE SUPER PLUS<sup>®</sup> is ideal for residential commercial and industrial applications. residential, commercial and industrial applications.

#### SURFACE PREPARATION:

Apply only to a sound, completely dry, well prepared roof surface. Leaks must be repaired before any coating is applied. If primer was applied, it is essential that the primer surface is clean and dry and free of all moisture. If no primer was applied, prepare surface by thoroughly pressure washing with a water and chlorine mixture using at least 1500 P.S.I. to remove any previous coatings, dirt, grease, and other foreign materials, especially mold, mildew and algae. PERMAKOTE SUPER PLUS<sup>®</sup> will resist mildew growth, but will not kill mildew already on the surface. Patch any holes, cracks. flashings, valleys, vents, etc. With PERMAKOTE SUPER PLUS<sup>®</sup> will resist mildew growth, but will not kill mildew already on the surface. Patch any holes, cracks, flashings, valleys, vents, etc., with PERMAPATCH<sup>™</sup>, a Waterproofing Caulk and Sealant. Tape & seal all seams with PERMATAPE<sup>™</sup>, a Polyester Fabric Tape.

Metal: Clean surface of all grease, oil and foreign matter before priming. Rusted metal and uncoated metal must be primed with METAL-PRIME RED-OX™, a Red Iron Oxide Primer Sealer. Use a degreaser on galvanized or coated metals which have oils or surface treatments. Check PERMAKOTE SUPER PLUS<sup>®</sup> adhesion on galvanized or coated metal by applying to a small area and evaluating after 48 hours. If lack of adhesion is present after evaluating, metal must be lightly scuffed without penetrating the coated inish or galvanizing. If applicable, use METAL-PRIME RED-OX<sup>™</sup> to spot prime the penetrated areas, then use PERMABOND™ Primer for entire coated or galvanized surface.

#### APPLICATION PROCEDURE:

Stir well before using. Do not thin, use product as is. Mix multiple containers of color together for greater color consistency. Do not apply when temperatures are below 45 degrees Fahrenheit or when humidity is very high. Do not apply when coating will be subjected to rain or heavy dew before it has had enough time to dry (approx. 2 to 4 hours). Drying time will vary depending on temperature, humidity and location. Apply using brush, roller or spray. Spread coating uniformly. Spread Rate will vary depending on surface. Apply each coat between 12 to 16 mils wet film thickness. Wait at least 12 hours before applying a second coat. Two coats resulting in a minimum 16 mil total dry film thickness is recommended. If primer was used, a minimum 20 mil total dry film thickness is required and is mandatory for warranty compliance.

Airless Sprayers: Use at least a 1 gallon per minute piston type airless sprayer with a minimum tip size of .027. Remove line filters and gun filters before spraving

Clean Up: Clean up all spills, tools and overspray immediately while the coating is still wet with warm soapy water.

## WARRANTY COMPLIANCE INFORMATION:

The PERMAKOTE<sup>®</sup> SUPER PLUS LIMITED MATERIAL WARRANTY is for Product Only and applies to chipping, cracking and peeling, only. Labor is not covered by this warranty. The WARRANTY is available only when product is applied according to Manufacturer's Application Procedures and Strict Material Requirement Specifications and a Warranty Registration (and a Job Completion Form if coated area exceeds 10,000 square feet) is submitted to Manufacturer within 90 days of completed coating application date (Application Procedure Sheets available upon request).

WARRANTY COMPLIANCE: Sloped Roofs and Flat Roofing Surfaces with slope less than 1" per 24" or an angle less than 4 degrees MUST BE Well Draining, and cannot be used as a tanking membrane coating. Roofs with parapet walls must have adequate drainage. Warranty will be unobtainable or void if these criteria are not met. MIL THICKNESS: A required primer coat of PERMABOND™ or METAL-PRIME RED-OX™ must be applied prior to the application of PERMAKOTE PLUS®/PERMAKOTE<sup>®</sup>

SUPER PLUS. Primer & two coats of PERMAKOTE PLUS®/PERMAKOTE® SUPER PLUS must result in a minimum 20 mil total dry film thickness. MINIMUM Spread Rates: PERMABOND™ or METAL-PRIME RED-OX™ must be applied no more than 150 square feet per gallon. PERMAKOTE PLUS<sup>®</sup>/PERMAKOTE<sup>®</sup> SUPER PLUS must be applied no more than 150 square feet per gallon per coat, resulting in an aggregate spread rate of 75 square feet per gallon for both coats.

In Any Event Nationwide Chemical Coating Manufacturers, Inc. will not be liable or responsible for any past, present or future leaks or any resulting consequential or incidental damages.
